Re: Alan Dawson / Sensible Safety Solutions

Subject: Testimonial

Date: 13th March 2009

My company, Overton Recycling Ltd, has used the services of Alan Dawson and his company, Sensible Safety Solutions, for the last three years. During that time Mr Dawson has acted as a consultant to our business on all aspects of Health & Safety. His remit has been very wide, including completing a very wide ranging Fire Risk Assessment; organising a DSEAR zonal risk assessment and, on the environmental side, oversaw our ISO14001 set up - helping us to put into place the correct tools for its successful completion later this year.

Until we recruited a Health & Safety Manager of our own (a successful process that he also implemented for us), Alan looked after all Health & Safety and Environmental issues in the business. So it is fair to say that he is perfectly able to implement as well as advise businesses on policy. This ability to 'muck in' as well as to know when to step back makes Alan and his business uniquely able to respond to the demands of all sizes of businesses. His excellent communication skills ensure he is equally at home on the shop floor carrying out environmental training with the staff as he is advising Directors on policy direction. Couple this with a wide ranging experience of industry and a down to earth, common sense approach to problem solving, and you have what I can only describe as the perfect credentials for a professional consultant.

Should you wish to discuss in confidence Mr Dawson's suitability for any proposed work that your company has in mind, I would urge you to call me on 01384 896660 and I would be happy to discuss the above in more detail.

Yours sincerely

D S OVERTON
Director
