

I can confirm that Alan Dawson of Sensible Safety Solutions Ltd was recently engaged by PROJEN to carry out some Safety related consultancy. In response to your specific questions :-

\* work undertaken

Alan was engaged to carry out an ISO 14001 Gap analysis/Audit at our head office in Northwich. He spent a day on site examining our facilities and working procedures as well as interviewing personnel in our various departments. Alan then produced a report and supplied support information which was the basis for our companies decision to move forward with ISO 14001 accreditation.

\* benefits to your organization

Without Alan's input, we would not have been able to fully understand the issues involved, and would not have been able to form a valid view of the way forward. Alan's report also allowed us to quantify the costs involved to the business.

\* if timescales and deadlines were met.

Our timescales were 'demanding', Alan responded quickly and delivered his report ahead of schedule.

\* if you would recommend them to another business with similar needs

Alan has a vast range of experience in this area and in general Health and Safety matters. Alan is approachable, non-contractual and very professional. I would have no hesitation in recommending him, and I envisage that we will be benefiting from his services again whenever a suitable opportunity arises.

I hope that the above suffices, should you need any further clarification. please feel free to contact me via this email address or via one of the phone numbers listed below.

Could you please confirm receipt of this e-mail

Regards

Shane Pugh

Energy Environmental & Compliance Services Manager
